¹The incidence rates represent the number of injuries and illnesses per 100 full-time equivalent workers and were calculated as: $(N/EH) \times 200,000$, where

N = number of injuries and illnesses

EH = total hours worked by all employees during the calendar year

200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year)

²Totals include data for industries not shown separately.

³North American Industry Classification System -- United States, 2017

⁴Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

⁵Excludes farms with fewer than 11 employees.

⁶Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore, estimates for these industries are not comparable to estimates in other industries.

⁷Data for Mining (Sector 21 in the North American Industry Classification System -- United States, 2017) include establishments not governed by the Mine Safety and Health Administration rules and reporting, such as those in Oil and Gas Extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration (MSHA), U.S. Department of Labor. Due to data unavailability, preliminary data from a fourth quarter MSHA file was used for RY 2024 estimates. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore, estimates for these industries are not comparable to estimates in other industries.

⁸Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. The scope of the data published in the SOII differs from the scope of the data published by the FRA. For more information on differences see the SOII Handbook of Methods Data Concepts page: <https://www.bls.gov/opub/hom/soii/data.htm>.

⁹Relative standard errors were not calculated for mining, except oil and gas (NAICS 212), and rail transportation (NAICS 482).

¹⁰Less than 15 cases

NOTE: Because of rounding, components may not add to totals. Dash indicates data do not meet publication guidelines.
