6 LEG-OSR-HND

7 CHIEF ADMINISTRATIVE OFFICER  
8 OF THE OCCUPATIONAL SAFETY AND  
9 HEALTH ADMINISTRATION, DIVISION  
10 OF INDUSTRIAL RELATIONS OF THE  
11 DEPARTMENT OF BUSINESS AND  
12 INDUSTRY,

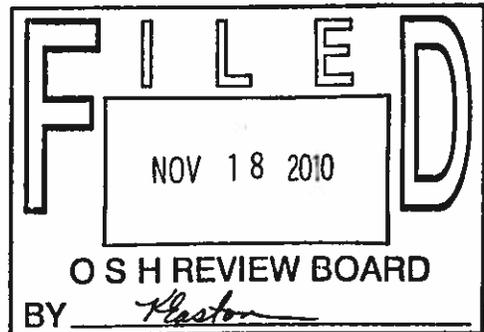

Docket No. LV 11-1437

13 Complainant,

14 vs.

15 DESERT GLASS PRODUCTS, LLC,

16 Respondent.

17 **DECISION**

18 This matter having come before the **NEVADA OCCUPATIONAL SAFETY AND**  
19 **HEALTH REVIEW BOARD** at a hearing commenced on the 13<sup>th</sup> day of October,  
20 2010, in furtherance of notice duly provided according to law, MR. JOHN  
21 WILES, ESQ., counsel appearing on behalf of the Complainant, **Chief**  
22 **Administrative Officer of the Occupational Safety and Health**  
23 **Administration, Division of Industrial Relations (OSHA);** and MR.  
24 JONATHAN HANSEN, ESQ., appearing on behalf of Respondent, **Desert Glass**  
25 **Products, LLC; the NEVADA OCCUPATIONAL SAFETY AND HEALTH REVIEW BOARD**  
26 finds as follows:

27 Jurisdiction in this matter has been conferred in accordance with  
28 Nevada Revised Statute 618.315.

The complaint filed by the OSHA sets forth allegations of violation

1 of Nevada Revised Statutes as referenced in Exhibit "A", attached  
2 thereto.

3 Citation 1, Item 1, charges a violation of 29 CFR  
4 1910.147(c)(4)(ii)(C). The complainant alleged that the employer  
5 respondent did not ensure that energy control procedures clearly and  
6 specifically outlined the steps for placement, review and transfer of  
7 lock out devices. The violation was classified as "failure to correct".  
8 The proposed penalty for the alleged violation is in the amount of  
9 THIRTY THOUSAND DOLLARS (\$30,000.00).

10 Citation 1, Item 2, charges a violation of 29 CFR  
11 1910.147(c)(7)(I). The complaint alleged that the employer respondent  
12 did not ensure that employees were trained and acquired the knowledge  
13 and skills required for safe use of lock out/tag out. The violation was  
14 classified as "failure to correct". The proposed penalty for the  
15 alleged violation is in the amount of THIRTY THOUSAND DOLLARS  
16 (\$30,000.00).

17 Complainant and respondent counsel presented opening statements.

18 Counsel for the Chief Administrative Officer referenced the unusual  
19 aspects of the case due to the failure to correct classifications and  
20 substantial penalty assessments based upon NRS 618.655. Counsel  
21 explained that the penalties under the statutory reference permit a  
22 monetary fine at \$7,000.00 per day, but noted OSHA assessed only  
23 \$1,000.00 per day for thirty (30) days. Counsel represented the  
24 evidence will show the employer knew of the violative conditions and  
25 failed to correct them. The employer entered into a written settlement  
26 agreement to correct and abate the violative conditions but did not  
27 comply with its agreement. Counsel contended the law requires a system  
28 of deterrence for the failure to correct and abate serious conditions

1 of hazard exposure to protect employees and therefore the violations and  
2 substantial penalties should be confirmed by the board.

3 Counsel for respondent presented its opening statement. He  
4 asserted that no actual harm resulted to any respondent employees from  
5 the cited conditions or failure to correct same. He further contended  
6 there was no potential for hazard exposure based upon the employer's  
7 safety instructions, and the employer good history for safety. Further,  
8 the employer agreed to correct the conditions and believed the  
9 violations were abated. He asserted the evidence will show a new OSHA  
10 employee disrupted the settlement process by concluding the abatement  
11 plan was not good enough. Counsel stated the OSHA abatement terms were  
12 vague and ambiguous such that the respondent, notwithstanding its good  
13 faith effort, was unable to comply.

14 Counsel for the Chief Administrative Officer presented testimonial  
15 and documentary evidence with regard to the alleged violations. Mr. Al  
16 Heuther, an OSHA safety supervisor, identified Exhibits A and B admitted  
17 in evidence without objection. Exhibit A included OSHA inspection  
18 sheets, the citations, and the informal settlement agreement executed  
19 by the parties dated March 26, 2010. Exhibit B included the respondent  
20 lock out/tag out "LO/TO" procedures, training records and company safety  
21 manual. Mr. Heuther testified that when he received Exhibit B from the  
22 respondent, he advised the company safety representative the abatement  
23 procedures implemented did not comport with the law and settlement  
24 agreement of the parties. Mr. Heuther informed respondent safety  
25 manager Shourds that he needed to establish procedures in compliance  
26 with the standard requirements for all LO/TO related equipment. Mr.  
27 Heuther identified Exhibit A, page 23 through 26 as the informal  
28 settlement agreement executed by complainant and respondent. He

1 testified the employer failed to correct the cited violations as agreed,  
2 including requiring safety manager Shourds attend a training class as  
3 required in the settlement agreement. Mr. Heuther further testified that  
4 respondent employer also failed to comply with the settlement agreement  
5 and abate the violations to satisfy the LO/TO requirements for various  
6 and different types of machinery. He explained that the locks and tags  
7 must be ". . . put on and taken off in a very particular manner . . ."  
8 He testified at Citation 1, Item 1, referencing 29 CFR 1910.147  
9 (c)(4)(ii)(C), that the serious violation initially assessed bore a  
10 penalty of \$1,125.00 but was substantially increased because of the  
11 "failure to correct" classification based upon NRS 618.655.

12 Mr. Heuther identified Exhibit C admitted in evidence and noted the  
13 procedures in Exhibit C were satisfactory to some extent by a showing  
14 of supervisory control but failed to meet compliance as the standard  
15 also required **all employees** be trained and that training records or  
16 information supporting same submitted to OSHA.

17 At Citation 1, Item 2, referencing 29 CFR 1910.147(c)(7)(I), Mr.  
18 Heuther testified the respondent was charged for failing to assure that  
19 employees, including safety director Shourds, were trained and acquired  
20 the knowledge and skill required for the safe use of the LO/TO  
21 procedures. He identified Exhibit A, page 17 and read a letter from the  
22 employer respondent to OSHA dated March 5, 2010. The letter represented  
23 to OSHA that the violations initially subject of the inspection and  
24 citation had been corrected and the settlement agreement satisfied.  
25 However, based upon a lack of documentation to confirm the training and  
26 after a follow on inspection it was determined the violations had not  
27 been corrected nor the settlement agreement subject of compliance.

28 Mr. Heuther referenced Exhibit B, page 1 and testified it did not

1 establish training for anyone other than the individual who executed the  
2 document and therefore confirmed a violation of the standard.

3 On cross-examination, Mr. Heuther testified the safety and health  
4 representative (SHR) who conducted the initial inspection is no longer  
5 employed by OSHA. He explained Exhibit B, page 3, as his hand notes  
6 indicating no receipt of documentation to establish that a training  
7 class had been attended in furtherance of the settlement agreement. At  
8 Exhibit E, page 4 he testified as to his note showing inadequate  
9 abatement and the need to do a follow up inspection. Counsel questioned  
10 the substantial proposed penalties and lack of any notification by OSHA  
11 for the potential increase of penalties under failure to correct  
12 classification being shown in the settlement documentation. Mr. Heuther  
13 testified the penalties are authorized by Nevada law. The witness  
14 further testified at Exhibit B, that the employer procedure for LO/TO  
15 was partially okay for **implementation** of lock out/tag out but lacked  
16 procedures on **removal** of the lock out/tag out to place the equipment  
17 back in service all as required under the standard. The witness  
18 testified that anyone who implements a "LO/TO" must be trained to remove  
19 same.

20 Counsel for complainant presented witness testimony from safety and  
21 health representative (SHR) Kimberlee Heckman who testified she  
22 performed the follow up inspection of the employer worksite under the  
23 directions of her supervisor. At the worksite she met Mr. Luke  
24 Pastulovic who she understood to be a maintenance employee of  
25 respondent. He told her he was developing an employee training program  
26 for the employer. She referenced Exhibit F, page 5 and testified from  
27 her closing notes there were no training records provided for the LO/TO  
28 program or procedures as required by the standards. Based upon her

1 investigation she cited the employer for a failure to correct the  
2 initial violations. Mrs. Heckman testified the penalty at \$30,000.00  
3 for each violation was determined in accordance with the operations  
4 manual but after reduction by her supervisor which resulted in a fine  
5 of only \$1,000.00 per day for 30 days as opposed to \$7,000.00 per day  
6 as authorized under Nevada law.

7 On cross-examination, Ms. Heckman testified that she cited the two  
8 (2) violations because the documents on LO/TO procedures did not meet  
9 requirements of the standard at Citation 1, Item 1. At Citation 1, Item  
10 2, the training documentation provided was for only one person she  
11 believed to be an employee whereas the standard requires training for  
12 all employees.

13 Counsel for respondent presented its case in defense of the  
14 violations charged and penalties proposed. Mr. Kirk Vaught identified  
15 himself as the general manager of respondent. He testified the original  
16 cited violations of February 11, 2010 were settled through an informal  
17 settlement agreement executed by OSHA and he on behalf of the  
18 respondent. He testified that notwithstanding abatement, OSHA was not  
19 satisfied as to compliance with the settlement agreement so directed  
20 another SHR to perform a follow up inspection. He testified Ms. Heckman  
21 found the violations remained and cited the respondent on June 10, 2010.  
22 Mr. Vaught testified that none of his employees are not authorized to  
23 perform any repairs on any of the equipment on the premises. He  
24 identified Mr. Luke Pastulovic as an outside independent contractor, not  
25 an "employee", retained by respondent to perform equipment maintenance  
26 and repair. He said no company employees, including those who operate  
27 or monitor the machines, repair the equipment for the company, as it is  
28 all performed by the outside independent contractor. Mr. Vaught

1 responded to questions from counsel and testified Mr. Pastulovic to be  
2 an independent contractor and a maintenance engineer, paid a fee under  
3 contract rather than salary as an employee. He testified the equipment  
4 is very sophisticated ranging in value from \$500,000.00 to  
5 \$2,000,000.00. If there is any stoppage of the equipment, the  
6 supervisor is notified and the circuit breaker simply turned off. No  
7 one is allowed to inspect or repair the equipment except for Mr.  
8 Pastulovic the independent contractor with appropriate training and  
9 expertise. He testified that only a supervisor has authority to shut  
10 off a circuit breaker if a failure occurs. All employees are  
11 instructed to contact a supervisor if a machine breaks down. Mr. Vaught  
12 analogized the condition as similar to a company truck driver who, upon  
13 a breakdown, is not authorized to open the hood and attempt to repair  
14 same but rather must contact his supervisor who calls in the appropriate  
15 expertise to resolve the issue. He testified that each machine has a  
16 dedicated power source and that ". . . every machine has its own circuit  
17 breaker . . ." He confirmed Exhibit A, page 23 to be a copy of the  
18 executed informal settlement agreement which includes provisions for  
19 abatement. Mr. Vaught testified Exhibit A, page 26 to be a copy of his  
20 letter dated March 30<sup>th</sup> submitted to OSHA identifying the hazard  
21 communications program. He testified that he believed the terms of the  
22 settlement agreement had been satisfied and the violations abated. He  
23 stated that his former safety manager never informed him there was any  
24 problem after March 30.

25 On cross-examination by complainant's counsel, Mr. Vaught testified  
26 that Exhibit A, page 16 is the company LO/TO safety policy. He further  
27 testified that in his March 5 letter to OSHA he was referencing Exhibit  
28 B, pages 2 through 9, to establish compliance not Exhibit A, page 16,

1 the original company policy. He further testified there were verbal  
2 instructions to employees advising them that if the machinery failed  
3 they were to notify a supervisor. There were no written instructions  
4 confirming same.

5 Respondent counsel presented testimony from Mr. Luke Pastulovic who  
6 identified himself as an independent contractor and responsible for  
7 specialized maintenance, repair and advisory services to the respondent  
8 employer. He testified he is not an employee, has extensive LO/TO  
9 training and identified his signature on Exhibit B in evidence. He  
10 further testified that he informed the SHR he was **working** on the  
11 premises but never stated he was an **employee**. Mr. Pastulovic helped to  
12 develop the company safety program. He testified he could receive no  
13 help from "SCATS" nor any assistance from OSHA enforcement on what they  
14 specifically required to comply with the standards. He testified that  
15 he believed he was only required to develop and provide procedures for  
16 ". . . lock out/tag out in order to de-energize the equipment but not  
17 re-energize . . ."

18 On cross-examination Mr. Pastulovic testified that he assisted in  
19 developing the company equipment safety procedures but as a Canadian  
20 citizen not aware of US laws. He drafted pages 2 through 9 of Exhibit  
21 B. He further testified that he did not address "training" but only  
22 "procedures", because both apply only to him as he is the ". . . only  
23 person authorized to perform repairs . . ." He testified that none of  
24 respondent employees are exposed to the subject hazards to require the  
25 LO/TO procedures and training as cited. He testified the procedures  
26 were never intended to apply to any employees because the company safety  
27 policy permits only he to shut down equipment. He testified that if he  
28 is not on the premises, there is no tag out after a supervisor shuts the

1 circuit breaker.

2 Counsel for the complainant presented closing argument. Counsel  
3 asserted that Exhibit A, page 12, established an abatement date of March  
4 16, 2010 and page 5, Exhibit A explained requirements for abatement.  
5 He argued that general manager Vaught wrote to OSHA on March 5 as  
6 referenced in Exhibit A, page 17, and falsely represented that  
7 everything had been completed in furtherance of the settlement  
8 agreement. Counsel noted the standard requires protection from  
9 dangerous equipment and compliance must be met under the standard which  
10 clearly did not occur. He argued that respondent should be held to the  
11 terms of the settlement agreement and representations of the company  
12 general manager. The violations were clearly established by the  
13 evidence and acknowledged in the settlement agreement which provided for  
14 abatement of the violations cited.

15 Counsel argued that the company chose to utilize the services of  
16 Mr. Pastulovic, a foreign citizen, unfamiliar with United States  
17 occupational safety and health law, trained in Canada, and by his own  
18 admission lacked knowledge in the applicable regulations. The company  
19 believed that it could satisfy the law by simply contracting with Mr.  
20 Pastulovic. He argued that the company submitted Exhibit B as to  
21 procedures which might have looked good on paper but there was no  
22 training on the procedures. Many employees in the area were exposed to  
23 the recognized hazard because no LO/TO procedures or training were in  
24 place. The respondent did not perform as agreed in the settlement  
25 agreement to correct and abate the cited conditions and therefore  
26 company employees were exposed to serious electrical dangers.

27 Counsel for complainant argued that the penalties are fair even  
28 though thirty times higher than initially assessed because the

1 respondent ignored the problems and falsely represented to OSHA on March  
2 5<sup>th</sup> that everything had been abated/satisfied. They were even given  
3 extra time to resolve the matters but nothing was forthcoming. The  
4 penalties had already been reduced from the statutory maximum by the  
5 district manager and should be confirmed.

6 Respondent counsel presented closing argument. Counsel asserted  
7 respondent believed it had complied with the terms of the informal  
8 settlement agreement based upon information from the then safety  
9 manager. The general manager honestly wrote to OSHA representing  
10 everything had been completed. He asserted that there was no follow on  
11 letter or specific correspondence advising the respondent that what had  
12 been submitted was insufficient. He argued that SHR Heckman and OSHA  
13 supervisor Heuther disagreed in their testimony and were apparently as  
14 confused as the employer who thought it had complied until Ms. Heckman  
15 showed up in June and advised of the lack of compliance with the  
16 standards and issued citations. Counsel argued Exhibit C, page 2,  
17 demonstrates the company did what was required by notifying employees  
18 to contact their supervisor if there was any problem with the equipment.  
19 Counsel concluded by asserting that no standard requires **written**  
20 training, the respondent did in fact verbally train and Exhibit C  
21 demonstrated the company procedures.

22 In reviewing the testimony, exhibits, and arguments of counsel, the  
23 board is required to measure same against the elements to establish  
24 violations under Occupational Safety & Health Law based upon the  
25 statutory burden of proof and competence of evidence.

26 In all proceedings commenced by the filing of a  
27 notice of contest, the burden of proof rests with  
the Administrator. (See NAC 618.788(1).

28 All facts forming the basis of a complaint must be

1 proved by a preponderance of the evidence. See  
2 Armor Elevator Co., 1 OSHC 1409, 1973-1974 OSHD  
3 ¶16,958 (1973).

4 To prove a violation of a standard, the Secretary  
5 must establish (1) the applicability of the  
6 standard, (2) the existence of noncomplying  
7 conditions, (3) employee exposure or access, and  
8 (4) that the employer knew or with the exercise of  
9 reasonable diligence could have known of the  
10 violative condition. See Belger Cartage Service,  
11 Inc., 79 OSAHRC 16/B4, 7 BNA OSHC 1233, 1235, 1979  
12 CCH OSHD ¶23,400, p.28,373 (No. 76-1948, 1979);  
13 Harvey Workover, Inc., 79 OSAHRC 72/D5, 7 BNA OSHC  
14 1687, 1688-90, 1979 CCH OSHD 23,830, pp. 28,908-10  
15 (No. 76-1408, 1979); American Wrecking Corp. v.  
16 Secretary of Labor, 351 F.3d 1254, 1261 (D.C. Cir.  
17 2003).

18 A respondent may rebut allegations by showing:

- 19 1. The standard was inapplicable to the situation  
20 at issue;
- 21 2. The situation was in compliance; or lack of  
22 access to a hazard. See, Anning-Johnson Co.,  
23 4 OSHC 1193, 1975-1976 OSHD ¶ 20,690 (1976).

24 The admitted evidence, including Exhibit A, page 23, the informal  
25 settlement agreement, establishes violations of the cited standards.  
26 The respondent executed the settlement agreement and provided  
27 correspondence from its general manager that the violations had been  
28 abated. The follow up inspection demonstrated the violations continued  
without abatement and/or compliance with the settlement agreement.  
There is no alternative but to confirm violations of the standards under  
the facts and governing law. The standard was **applicable** to the facts  
in evidence, **non-complying conditions** were established and admitted by  
reference to the signed informal settlement agreement which required  
abatement of violations, **employee exposure** through access to hazardous  
conditions was demonstrated by a lack of employee training, and the  
**employer knew** of the violative conditions by signing the informal  
settlement agreement. **The subject standards are intended to protect**

1 **employees by training them to be aware of and avoid recognized hazards**  
2 **in the workplace.** Based upon the facts and law, the violations must be  
3 confirmed.

4 Established occupational safety and health law does not permit an  
5 employer to "contract away" its obligation to assure safety in the  
6 workplace through compliance with applicable safety standards.

7 Bayside Pipe Coaters, Inc., 2 OSHC 1206, 1974-1975  
8 OSHD ¶ 18,677 (1974); Frohlick Crane Service, 2  
9 OSHC 1011, 1973-1974 OSHD ¶ 18,079 (1974), aff'd,  
10 Frohlick Crane Serv., Inc. v. Occupational S. & H.  
11 R.C., 521 F.2d 628 (10<sup>th</sup> Cir. 1975): An employer  
cannot **contract away** his responsibility under the  
Act where the economic realities of the  
circumstances of employment establish the  
responsibility for safety is his. (emphasis added)

12 The board further finds facts in evidence which demonstrate the  
13 proposed penalties to be subject to mitigation. OSHA is authorized  
14 under NRS 618.655 to assess penalties for a failure to correct/abate up  
15 to \$7,000.00 per day. The statute was reasonably applied through its  
16 district manager relying upon guidance in the operations manual to  
17 reduce the penalties to \$1,000.00 a day for a maximum of 30 days.  
18 However, the spirit and intent of occupational safety and health law  
19 must be balanced with conditions in the workplace and level of potential  
20 hazard exposure. The board finds from the testimony, documentation and  
21 evidence that there was no employer history of OSHA violations nor  
22 evidence of a callous disregard of the law governing safety and health  
23 in its workplace. There were no injuries resulting from the cited  
24 violative conditions. While the **potential** for exposure to hazardous  
25 conditions is the governing criteria, there was substantial evidence  
26 that company policy and practice was that no employees or operators of  
27 the equipment were permitted to work on any equipment subject of a  
28 failure. Employee "access" to hazardous conditions in an electrical

1 panel was very unlikely in that only a supervisor was allowed to even  
2 shut down a circuit breaker. Testimony showed some degree of verbal  
3 safety instruction to warn employees that no one was to shut down or  
4 effectuate repairs on any equipment, but rather contact a supervisor.  
5 The evidence supports an inference of a limited level of potential  
6 exposure to electrical hazards controlled by LO/TO procedures and  
7 training.

8       The OSHA enforcement section is not charged with education or  
9 training of employers to assure they comply with the law. Respondent  
10 could have done far more even in the asserted distressed economic times  
11 to better understand the applicable occupational safety and health  
12 standards. However, there is evidence to support an inference that the  
13 former safety manager charged with compliance responsibilities failed  
14 to adequately inform the respondent of its obligations. While the  
15 foregoing is not a defense to the violations, it does demonstrate the  
16 respondent did employ a safety representative employee who was charged  
17 with assuring compliance as to both occupational safety and health law  
18 and the informal settlement agreement.

19       It appears that had the employer been proactive toward safety, even  
20 in what the general manager described as very difficult economic times  
21 and a reduction in the work force, it could have reasonably resolved the  
22 conditions cited at far less dollar cost than exposing itself to the  
23 extremes of failure to abate and correct penalties. The employer should  
24 understand that assessment of penalties is part of the deterrence  
25 methodology established under occupational safety and health law to  
26 induce employee protection in the workplace. While the board is  
27 reluctant to erode appropriate enforcement action which included a very  
28 reasonable settlement agreement, and fair consideration extended by all

1 of the OSHA personnel including particularly the district manager  
2 ultimately responsible for assessing and adjusting penalties, the  
3 mitigating factors in this distressed economic climate warrant a  
4 reduction in the total penalties proposed to \$10,175.00. The reduced  
5 penalties, while substantially less than that proposed, are determined  
6 sufficient to warn and deter repeated action by the employer while being  
7 fair and reasonable based upon the evidence in mitigation.

8 See Long Manufacturing Company, N.C., Inc. v.  
9 OSHARC and Marshall, 55 F.2d 903, 918 (8<sup>th</sup> Cir.  
10 1977); and Nevada Director of Occupational Safety  
11 and Health v. Clayburn, Incorporated, Docket No.  
12 84-280, Filed December 26, 1984, Nevada  
Occupational Safety and Health Review Board. The  
review board may confirm a penalty as assessed in  
the same amount imposed by the Chief Administrator  
or a lesser or a greater amount.

13 It is the decision of the **NEVADA OCCUPATIONAL SAFETY AND HEALTH**  
14 **REVIEW BOARD** that violations of Nevada Revised Statutes did occur as to  
15 Citation 1, Item 1, 29 CFR 1910.147(c)(4)(ii)(C) and Citation 1, Item  
16 2, 29 CFR 1910.147(c)(7)(I). The classifications of the violations as  
17 "Failure to Correct" are confirmed. The total penalties are adjusted,  
18 reduced and approved in the amount of TEN THOUSAND ONE HUNDRED SEVENTY-  
19 FIVE DOLLARS (\$10,175.00) in total for both violations.

20 The Board directs counsel for the complainant, **CHIEF ADMINISTRATIVE**  
21 **OFFICER OF THE OCCUPATIONAL SAFETY AND HEALTH ENFORCEMENT SECTION,**  
22 **DIVISION OF INDUSTRIAL RELATIONS,** to submit proposed Findings of Fact  
23 and Conclusions of Law to the **NEVADA OCCUPATIONAL SAFETY AND HEALTH**  
24 **REVIEW BOARD** and serve copies on opposing counsel within twenty (20)  
25 days from date of decision. After five (5) days time for filing any  
26 objection, the final Findings of Fact and Conclusions of Law shall be  
27 submitted to the **NEVADA OCCUPATIONAL SAFETY AND HEALTH REVIEW BOARD** by  
28 prevailing counsel. Service of the Findings of Fact and Conclusions of
