

The matter came on for hearing before the Nevada Occupational Safety and Health Board
of Review on November 9, 2022, in furtherance of a notice, duly provided according to law. *See*,
Notice of Hearing dated September 10, 2022. Salli Ortiz, Esq., appeared on behalf of the
complainant, Chief Administrative Officer of the Occupational Safety and Health

Law Offices of Charles R. Zeh, Esq. 50 West Liberty Street, Suite 950 Reno, Nevada 89501 Tel.: (775) 323-5700 FAX: (775) 786-8183

1	Administration, Division of Industrial Relations (the State). See, Tr., pp. 12;23-24, 13;1-4. <sup>1</sup>
2	Stanley Popek, a lay person representative, appeared on behalf of Solar Star. See, Tr., p. 8;10-13.
3	In attendance at the September 9, 2021, hearing were Acting Board Chairman William
4	Speilberg, Board Members Frank Milligan, Jorge Macias and Scott Fullerton. See, Tr., p. 1.
5	There being four members of the Board present to hear this matter with at least one member
6	representing management and one member representing labor, in attendance, a quorum was
7	present to hear the matter and conduct the business of the Board. Charles R, Zeh, Esq., The Law
8	Offices of Charles R. Zeh, Esq., was present as legal counsel to the Board. See, Id.
9	On April 28, 2022, the Citation and Notification of Penalty (Citation) was issued to the
10	Respondent alleging certain violations of Federal regulations and Nevada law. Citation 1, Item 1,
11	charged a serious violation of 29 CFR 1926.501(b)(13), as stated below:
12	Each employee engaged in residential construction activities six (6) feet (1.8 m) or more above lower levels shall be protected by guardrail systems, safety net
13	system, or personal fall arrest system unless another provision in paragraph (b) of this section provides for an alternative fall protection measure. Exception: When
14	the employer can demonstrate that it is infeasible or creates a greater hazard to use these systems, the employer shall develop and implement a fall protection
15	plan which meets the requirements of paragraph (k) of 1926.502.
16	Employees were performing residential construction activities six (6) feet or more above a lower level, at the north and south end of the residential rooftop with
17	unprotected sides and edges. They were not protected from falling by guardrail systems, safety net systems, or personal fall arrest systems. Employees were
18	installing photovoltaic (PV) equipment on the rooftop, working from heights of up to approximately 14 feet 7 inches without any means of fall protection in
19	place. Falling from such heights could result in serious injuries such as broken bones, head and/or spinal injuries, or death. See, State's Exhibit 1, pp. C41-C52.
20	
21	Citation 1 Item 2 alleged a serious violation of 29 CFR 1926.503(a)(1), as stated below:
22	The employer shall provide a training program for each employee who might be exposed to fall hazards. The program shall enable each employee
23	to recognize the hazards of falling and shall train each employee in the procedures to be followed in order to minimize these hazards.
24	Solar Star LLC did not ensure that each employee who might be exposed
25	to a fall hazard was provided training to enable each employee to recognize the hazards (sic) of falling and procedures to be followed in
26	order to minimize these hazards. Two employees were installing photovoltaic (PV) equipment on the roof of a single story home at heights
27	
28	<sup>1</sup> "Tr." stands for the transcript of the hearing conducted on November 9, 2022, followed by the page and line number where the matter cited can be found. -2-

1 of up to 14 feet 7 inches without fall protecting training. The employees were exposed to fall hazards which could result in serious bodily injuries 2 such as broken bones, head and/or spinal injuries, or death, in the event of	
	such as broken bones, head and/or spinal injuries, or death, in the event of
3	a fall to the concrete surface below due to their inability to recognize and minimize the hazards of falling. <i>See</i> , State's Exhibit 1, pp. C28-C32.
4	Citation 2, Item 1, alleged a regulatory violation of NRS 618.987(1), as stated below:
5	If a construction worker other than a supervisory employee fails to present
6 OSHA-10 course not later than 15 days after being hired, the employer	
7	shall suspend or terminate his or her employment.
At the time of the Inspection, an employee was engaged in construction activity and was not in possession of a current and valid completion card for an OSHA 10-Hour Course. The construction worker had been employed beyond 15 days, and failed to present their employer with a completion card for an OSHA 10-Hour Course. The employer did not ensure that a construction worker who had been employed for approximately 22 days presented an OSHA-10 course completion card after employment with the company. <i>See</i> , State's Exhibit 1, pp. C33-C36.	activity and was not in possession of a current and valid completion card
	employed beyond 15 days, and failed to present their employer with a
	ensure that a construction worker who had been employed for
12	Citation 2, Item 2, alleged a regulatory violation of NRS 618.987(2), as stated below:
13	If a supervisory employee on a construction site fails to present his or her employer with a current and valid completion card for an OSHA-30
14	course not later than 15 days after being hired, the employer shall suspend or terminate his or her employment.
15	At the time of the inspection, a supervisory employee was engaged in
16	construction activity and was not in possession of a current and valid completion card for an OSHA 30-Hour Course. The supervisory
17	construction worker had been employed beyond 15 days, and failed to present their employer with a completion card for an OSHA 30-Hour
18	Course. The employer did not ensure that a supervisory construction worker who had been employed for approximately six years and five
19	months presented an OSHA-30 course completion card after employment with the company. <i>See</i> , State's Exhibit 1, pp. C37-C40.
20	
21	On May 31, 2022, the Respondent sent its notice of intent to contest the Citation. See,
22	State's Exhibit 1, p. C53. The Respondent's notice was a cursory response merely disagreeing
23	with each of the alleged violations. See, Id. On June 17, 2022, the State filed and served its
24	Complaint on the Respondent. See, State's Exhibit 1, pp. C54-C61. On or about July 13, 2022,
25	Mr. Popek answered the Complaint for the Respondent. See, State's Exhibit 1, p. C62. Therein,
26	none of the allegations were denied and no affirmative defenses were posited. See, Id. Instead,
27	Mr. Popek alleged that his efforts to determine the proper abatement requirements were
28	///

frustrated by bureaucratic inertia, *i.e.*, his telephone calls referred to multiple offices, none of
 which responded to his requests. *See, Id.*

At the hearing on the matter, the State offered for admission its Exhibits numbered 1 and 2, consisting of a total of 116 pages. *See*, Tr., p. 13;2-7. The Respondent did not object to the admission of the State's Exhibits 1 and 2. *See*, Tr., p. 18;11-15. The State's Exhibits were subsequently admitted into evidence. *See*, Tr., pp. 20;21-24, 21;1-4.

The Respondent offered four documents for admission. *See*, Tr., pp. 15;3-24, 16;1-19.
The first was its Exhibit A consisting of a tax return and the registration of the Respondent's
vehicles. *See*, Tr., p. 16;1-8. Second, the Respondent's Exhibit B was offered, consisting of an
OSHA 30 card and a pay stub of one of the Respondent's employee's. *See*, *Id*. Third, the
Respondent's Exhibit C was offered, consisting of its fall protection plan. *See*, Tr., p. 16;18-23.
The fourth document offered was entitled Document A was offered, and it clarified the
abatement requirements. *See*, *Id*.

The State objected to Document A. *See*, Tr., p. 20;8-15. The State's objection was
overruled and all of the Respondent's exhibits were admitted into evidence. *See*, Tr., p. 21;5-8.
Jurisdiction in this matter has been conferred in accordance with Chapter 618 of the Nevada
Revised Statutes.

At the November 9, 2022, hearing the State presented the testimony of OSHA
investigator Eric Hall. *See*, Tr., pp. 22-47. Solar Star presented the testimony of its owner, Mr.
Popek. *See*, Tr., pp. 48-55. Before any witnesses were called, Mr. Popek informed the Board he
was not denying any of the substantive allegations or positing any affirmative defenses. *See*, Tr.,
p. 47;21-23. Instead, the Respondent requested a reduction in the assessed penalties. *See*, Tr., pp.
54;12-24, 55;1-10.

## **FINDINGS OF FACT**

24

On October 26, 2021, three Solar Star employees, Hansel Stinson, Robert Tait and Mr.
Popek, were installing solar panels on the roof of a residence located in Pahrump, Nevada. *See*,
State's Exhibit 1, pp. C19-C22, C63, C64. No guardrails were present and none of the employees
were using PFAS. *See, Id.* Mr. Popek was the supervisor on this job. *See*, Tr., p. 25;20-22. Mr.

-4-

Tait was the installer of the solar panels on the roof of the residence. *See*, State's Exhibit 1, p.
C20. That day, Mr. Tait installed approximately 30 of the panels. *See*, *Id*. Mr. Tait estimated that
he spent 9 hours on the roof of that residence. *See*, State's Exhibit 1, p. C20. Mr. Stinson was
the crew's helper. *See*, State's Exhibit 1, p. C22. Mr. Stinson estimates that he spent about 4
hours as part of the installation of the solar panels. *See*, *Id*. Messrs. Popek, Tait and Stinson were
all of the Respondent's employees working on that residence on the date of incident.

Every side of the roof was at a height which required fall protection. The north end of the
roof was 14 feet 7 inches above the ground. *See*, State's Exhibit 1, pp. C66, C67, *see also*, Tr.,
pp. 32;20-22. The east end of the roof was 7 feet 10 inches above the ground. *See*, State's
Exhibit 1, pp. C68, C69, *see also*, Tr., p. 33;2-9. The southeast end of the roof was 7 feet 10
inches above the ground. *See*, State's Exhibit 1, pp. C70, C71, *see also*, Tr., p. 33;10-18. Adding
to the risk of a fall, the solar panels with which employees were working were large, 4 feet by 6
feet. *See*, Tr., p. 28;12-13.

14 This job was intended to be completed in a single day and the Respondent's employees 15 had to add in the travel time to and from Pahrump. Accordingly, the employees were subject to 16 time restraints on the job. See, State's Exhibit 1, p. C19, see also, Tr., p. 26:8-11. To deal with 17 the time restraints, neither of the workers on the roof utilized PFAS. See, State's Exhibit 1, pp. C19-C22. During the course of this work, an unidentified person photographed the Respondent's 18 19 employees working at heights in excess of 6 feet without PFAS. See, State's Exhibit 1, pp. C63, 20 C64. These photographs were provided to Nevada OSHA by the unidentified person. See Id., see 21 also, Tr., pp. 31;17-21, 32;1-4.

- On November 3, 2021, Mr. Hall inspected the company's warehouse located at 4560
  Arville Street, Unit C20, Las Vegas, Nevada. As part of that inspection, Mr. Hall was shown the
  Respondent's collection of PFAS. *See*, State's Exhibit 1, p. C65.<sup>2</sup> On November 15, 2021, Mr.
  Hall obtained a statement from Mr. Popek. *See*, State's Exhibit 1, p. C19. Therein, Mr. Popek
- 26

27

 <sup>&</sup>lt;sup>2</sup>This equipment consisted of a Guardian Fall Protection - Temper Anchors, Guardian Fall Protection
 - iSafe Body Harness, Sala Fall Protection Harness, Upgear - 6 foot lanyard, Miller - 6 foot lanyard, FSP - Self retracting lifeline, 3M Protecta - Self retracting lifeline. *See*, State's Exhibit 1, p. C65.

1 indicated that he was Solar Star's owner and that he had worked there for 6 years. See, Id. 2 Despite his executive position with the Respondent and his time on the job, Mr. Popek did not 3 possess an OSHA 30 card. See, Id. Mr. Popek's failure to obtain an OSHA 30 card appears to be 4 the result of his misunderstanding of the requirement. He believed that OSHA 30 cards are only 5 required for companies which have 10 or more employees on a job. See, Id. Mr. Popek also told the investigator that he was currently working on a written fall protection program. See, Tr., p. 6 7 26;12-17. Further, Mr. Popek told the investigator that he discusses safety topics and rules with 8 the Respondent's employees. See, State's Exhibit 1, p. C19, see also, Tr., p. 25;10-19. Mr. 9 Popek stated that he was considered the foreman at the Pahrump job site and was responsible for 10 safety at the job site. See, State's Exhibit 1, p. C19. On that day, Mr. Popek had observed his 11 employees working on the roof for a period of up to 7 hours. See, Id.

12 On November 3, 2021, Mr. Tait provided his statement to the OSHA investigator. See, 13 State's Exhibit 1, pp. C20, C21. Mr. Tait indicated that he had worked for Solar Star for three 14 years. See, Id. Mr. Tait confirmed that he was not using a PFAS on the date of incident. See, Id. 15 Further, he stated that he was present when the photographs, aforementioned, were taken. See, 16 *Id.* He confirmed Mr. Popek's statement that they were rushing because this was a one day job 17 with significant travel time to and from the job site consuming time on the job. See, Id. On 18 November 3, 2021, Mr. Stinson also provided a statement to the OSHA investigator. See, State's 19 Exhibit 1, p. C22. Mr. Stinson identified himself in one the photographs. See, Id.

20 At the November 9, 2022, hearing Mr. Hall testified to the calculation of the penalties for 21 each of the alleged violations. See, Tr., pp. 43-46. The penalty amounts were a function of the 22 gravity of the violation and probability of injury from the violation. See, Id. Regarding Citation 23 1, Item 1, the State determined that the gravity was high because two employees were exposed to 24 the possibility of serious injury. See, Tr., pp. 43;2-24, 44;1-8. The base penalty was then 25 calculated to be \$13,653. See, State's Exhibit 1, p. C24, see also, Tr., p. 44;9-15. The base 26 penalty was reduced by 80% as the result of the limited number of the Respondent's employees 27 and its lack of previous violations. See, Tr., p. 44;17-20. The amount of the discount was \$9,967, 28 resulting in a final penalty assessment of \$3,686. See, Id.

-6-

Regarding Citation 1, Item 2, the State determined that the gravity was high because two
employees were exposed to the possibility of serious injury. *See*, Tr., p. 45;4-7. The base penalty
was then calculated to be \$13,653. *See*, State's Exhibit 1, pp. C28, 29. The base penalty was
reduced by 80% as the result of the limited number of the Respondent's employees and its lack
of previous violations. *See*, Tr., p. 44;17-20. The amount of the discount was \$9,967, resulting in
a final penalty assessment of \$3,686. *See*, *Id*.

7 Regarding Citation 2, Item 1, the State determined that this was a regulatory violation 8 because it was a record keeping matter. See, Tr., p. 45;8-16. The gravity was moderate as a result 9 of the combination of severity and the probability of injury. See, Tr., pp. 45;17-24, 46;1-3. The 10 base penalty was then calculated to be \$1,095. See, State's Exhibit 1, p. C33, see also, Tr., p. 11 46;4-6. However, the base penalty was reduced by 80% as the result of the limited number of the 12 Respondent's employees and its lack of previous violations. See, Tr., p. 46;4-10. The amount of 13 the discount was \$960, resulting in a final penalty assessment of \$135. See, Id. Citation 2, Item 2, 14 was calculated exactly the same way, yielding another discount of \$960 and an assessed penalty 15 of \$135. See, Tr., p. 46;15-18.

The Respondent did not object to any of Mr. Hall's testimony regarding the penalty
calculations. Further, Star Solar did not cross-examination Mr. Hall regarding any of the penalty
calculations or the discounts applied.

19 When the Respondent had the opportunity to present its case, Mr. Popek admitted to the 20 liability with regard to the allegations. "I realize there was (sic) violations." See, Tr., p. 47;21-24. 21 Regardless, Mr. Popek's purpose in attending the hearing was to seek a reduction of the amount 22 of the penalty assessments. See, Tr., p. 47;21-24. Mr. Popek provided two reasons for which a 23 reduction in the penalty amount would be appropriate. The first was that he had made multiple, 15 24 to 20 calls to OSHA, to attempt to set up an informal review. See, Tr., pp. 52;10-24, 53;1-3. 25 Second, he claimed that the penalty would be 20% of the company's total revenue for the last year. See, Tr., pp. 54;12-18, 55;2-4. 26

- 27 ///
- 28 ///

1	Regarding the Respondent's first claim, Ms. Ortiz explained that there was a lot of
2	confusion on Mr. Popek's part.
3 4	Unfortunately, Mr. Popek has confused the various people he's talked to, the various offices he's spoken to and the various times he's spoken to them. As you saw this morning when he was talking about document A1,
he was saying Karen Kennedy sent that to him. We all know that Karen Kennedy, as Mr. Zeh's assistant, is not sending abatement information to	he was saying Karen Kennedy sent that to him. We all know that Karen
6	the situation. See, Tr., p. 53;11-20.
7 8	Further, Ms. Ortiz explained that Mr. Popek request for an informal conference occurred too late.
9 10	In regards to the [informal conference], Mr. Popek didn't contact OSHA until the 29th day. They only have until the 30th day and the district manager was not able to accommodate in that short time frame, so that's why the informal didn't happen. <i>See</i> , Tr., p. 51;8-12.
11	After the complaint was filed, Star Solar could only communicate with Ms. Ortiz' office. See, Tr.,
12	p. 51;14-23. This was part of the reason Mr. Popek had experienced such difficulties
13	communicating with the State.
14	Board Member Fullerton addressed the Respondent's concern regarding the amount of the
15	penalties by noting that they had already been reduced by over \$20,000. See, Tr., p. 59;17-22.
16	Additionally, Member Fullerton expressed concern that worker safety was put at risk because the
17	employer was in a rush. See, Tr., p. 60;13-17. "A rush does not abate the safety situation." See,
18	Id.
19	To the extent that any of the Conclusions of Law constitute Findings of Fact, they are
20	incorporated herein.
21	CONCLUSIONS OF LAW
22	In this case, the burden is on the State to prove its <i>prima facie</i> case against Solar Star by
23	a preponderance of the evidence. See, NAC 618.788(1), see also, Original Roofing Company
24	LLC v. Chief Administrative Officer of the Nevada OSHA, 442 P.3d 146, 149 (Nev. 2019). The
25	State is obligated to demonstrate the alleged violation by a preponderance of the reliable
26	evidence in the record. Mere estimates, assumptions and inferences fail this test. Conjuncture is
27	also insufficient. Findings must be based upon the kind of the evidence which responsible
28	persons are accustomed to rely in serious affairs. See, William B. Hopke Co., Inc. 1982
	-8-

I

OSHARC LEXIS 302 \* 15, 10 BNA OSHC 1479 (No. 81-206, 19820 (ALJ)). The Board's
 decision must be based on consideration of the whole record and shall state all facts officially
 noticed and relied upon. 29 CFR 1905.27(b). *Armor Elevator Co.*, 1 OSHA 1409, 1973-1974
 OHSD ¶ 16, 958 (1973). *Olin Construction Inc. v. OSHARC and Peter J Brenan, Secretary of Labor*, 525 F.2d 464 (1975).

Pursuant to NAC 618.788, the State carries the burden of proof in demonstrating a
violation of OSHA law by establishing: (1) the applicability of the OSHA regulation; (2)
noncompliance with the OSHA regulation; (3) employee exposure to a hazardous condition; and
(4) the employer's actual or constructive knowledge of the violative conduct. *See, Original Roofing Co., LLC v. Chief Admin. Officer of Occupational Safety & Health Admin.*, 135 Nev.
140, 143, 442 P.3d 146, 149 (2019); *Secretary of Labor v. Atl. Battery Co.*, 16 BNA OSHC
2131, 2135, 1994 WL 682922 (No. 90-1747, 1994).

13 Turning to the individual citations, the State provided evidence supporting its *prima facie* 14 case for each of the alleged violations. The standard of 29 CFR 1926.501(b)(13) applied because 15 it deals with employees not utilizing fall protection while working above six feet above a lower 16 level. See, State's Exhibit 1, pp. C20-C22. The Respondent violated the standard. The 17 Respondent's two employees admitted that they were on the roof for between 4 to 9 hours. See, Id. The employees claimed that they did not use fall protection because they were in a rush. See, 18 19 *Id.* Mr. Popek agreed that the fall protection was not used because the employees were in a rush. 20 See, State's Exhibit 1, p. C19. These same facts show that the Respondent's employees were 21 exposed to the violative condition.

The knowledge element can be established by demonstrating "that the employer either knew or with the exercise of reasonable diligence, could have known of the presence of the violative condition." *Original Roofing, supra,* at 143 *quoting Pride Oil Well Serv.*, 15 BNA OSHC 1809, 1814 (No. 86-692, 1992).

In this instance, the State produced evidence that the Respondent had actual knowledge
of a volative condition. Mr. Popek was at the job site, acting as a supervisory employee at the
time that the violative conduct occurred. *See*, State's Exhibit 1, p. C19. Mr. Popek

acknowledged that he knew the employees were working on the residence's roof without PFAS.
 *See, Id.* Mr. Popek agreed with the employees' statements that this took place because they were
 in a rush. *See, Id.*

Mr. Popek knows that fall protection is necessary. He provides instruction in fall
protection to the Respondent's employees. *See*, State's Exhibit 1, p. C19. Further, Mr. Popek
understands certain types of PFAS because Solar Star owns some of it. *See*, State's Exhibit 1, p.
C65. Accordingly, the State provided evidence in support of its *prima facie* case for Citation 1,
Item 1.

9 The standard for 29 CFR 1926.503(a)(1), applied because it requires employers to have
10 appropriate fall protection plan training. None of these employees had been trained because the
11 Respondent did not have a fall training program at the time that the violation occurred. *See*, Tr.,
12 p. 26;12-20. These same facts show that the Respondent's employees were exposed to the
13 violative condition.

In this instance, there is, again, actual knowledge from Mr. Popek. He told the
investigator that he was working on a fall protection program at the time that the citation was
issued. *See*, Tr., p. 26;12-20. In other words, there was not a currently enacted fall protection
plan for training. But, he knew one was required. *See*, State's Exhibit 1, p. C19, *see also*, Tr., p.
26;12-17. Accordingly, the State provided evidence supporting its *prima facie* case of a violation
of this regulation.

20 The standard for Citation 2, Item 1, NRS 618.987(1) applied because an OSHA 10 card is 21 required for construction work. See, Id. The standard was violated because Mr. Tait had worked 22 for the Respondent for more than 15 days without an OSHA 10 card. See, State's Exhibit 1, p. 23 C16, see also, Tr., p. 40;13-24. The Respondent admitted for everyone involved that an OSHA 24 10 card would be appropriate and required. However, Mr. Tait had worked for the Respondent 25 for three years without one. See, State's Exhibit 1, p. C16, see also, Tr., p. 40;13-24. No 26 explanation was given for this failure. See, Tr., p. 41;1-13. Actual knowledge was shown by Mr. 27 Popek, who knew that OSHA 10 cards are required because he had one. However, the 28 Respondent did not possess Mr. Tait's OSHA 10 card. See, State's Exhibit 1, pp. C20, C21.

-10-

Here again, the State provided evidence to support its *prima facie* case of a violation of
 applicable law.

3 ///

4 The standard for Citation 2, Item 2, applied because Mr. Popek himself was the 5 supervisory employee who did not possess an OSHA 30 card. See, Tr., p. 25;23-24. The 6 standard was violated because Mr. Popek did not have one. See, Id. His understanding was that 7 OSHA 30 cards are required for companies which have 10 or more employees on a job. See, 8 State's Exhibit 1, p. C19. Mr. Popek's understanding was incorrect. An OSHA 30 card is 9 required for any supervisor on a construction site once that person has worked for the employer 10 for more than 14 days. See, NRS . NRS 618.987(2). So, again the State presented evidence in 11 support of its allegation that the rule was violated.

As a final matter here, the Respondent admitted liability for each of the violations. *See*,
Tr., 47;21-24. The State, by this admission, clearly met its burden of proof.

Board Member Fullerton moved to uphold each citation, including the fines assessed and the abatement requirement. *See*, Tr., p. 63;14-19. The motion was seconded by Member Milligan. *See*, Tr., p. 63;21-22. The motion was adopted upon a vote of 4 in favor of the motion and 0 against the motion. *See*, Tr., pp. 63;23-24, 64;1-7. The Board, by this motion, authorizes the Chairman, Jorge Macias, after any grammatical or typographical errors are corrected in the Decision, to execute, without further Board review, this Decision on behalf of the Board of Review.

On November 13, 2024 the Board convened to consider adoption of this decision, as
written or as modified by the Board, as the decision of the Board.

Those present and eligible to vote on this question consisted of the 3 current members of
the Board, to-wit, Chairman Jorge Macias, Board Secretary William Spielberg and Board
Member, Scott Fullerton. Upon a motion by William Spielberg, seconded by Scott Fullerton, the
Board voted 3-0-2 (Tyson Hollis and Gled Bautista abstaining as they were not members of the
Board or in attendance when the matter was decided), to approve this Decision of the Board as
the action of the Board and to authorize Chairman Jorge Macias, after any grammatical or

-11-

1	typographical errors are corrected, to execute, without further Board review this Decision on
2	behalf of the Nevada Occupational Safety and Health Review Board. Those voting in favor of
3	the motion attended the hearing on the merits.
4	On November, 13, 2024 this Decision is, therefore, hereby adopted and approved as the
5	Final Decision of the Board of Review.
6	Dated this 4 <sup>th</sup> day of November, 2024. NEVADA OCCUPATIONAL SAFETY AND HEALTH REVIEW BOARD
7	AND HEALTH REVIEW BOARD
