

Long-Haul COVID-19: A Snapshot

***Ihsan Azzam, PhD, MD, MPH** is the Nevada State Chief Medical Officer who oversees public health surveillance, epidemiology, disease prevention and control activities; and provides ongoing advice to state agencies, local health authorities, healthcare providers and community-based organizations.*

He coordinates public health interventions with federal agencies; and provides professional education, clinical updates, guidelines, and recommendations to early-detect, control and contain disease outbreaks and clusters.

He provides instructions at the University of Nevada; and represents the state on national/international forums, advisory bodies, and academic institutions.

Dr. Azzam earned his medical degree from Cluj University of Medicine 1982 and completed OBGYN Residency in 1986. He holds the CDC Graduate Certificate in Epidemiology, Biostatistics and Demography from the University of Washington, Seattle School of Public Health and Community Medicine, and the CDC Chronic Disease Epidemiology Certificate from Penn State College of Medicine. He completed his MPH in 2002 and PhD in 2010 at the University of Nevada, Reno.
