

Nevada Occupational Safety and Health Administration (OSHA) Overview

Michael Rodrigues, Program Coordinator, Nevada OSHA - prior to being a Program Coordinator, he served as the Operational Support Unit Supervisor, a trainer, and a Compliance Safety and Health Officer. Mike has over 10 years of enforcement experience associated with occupational safety. He believes that, while enforcing regulations is a critical component of OSHA's overall operation, it is still just one element of our overall mission. He believes it is equally as important to provide the regulated community training, outreach, and education, as well as establishing partnerships with them.
